DETAILED ACTION

1. An action on the merits of claims 1-7 considered readable on Species A (Figures 1A and 1B) is included in this office action with claims 8-24 being withdrawn from consideration. 37 C.F.R. § 1.142(b). Election was made with traverse in the response filed May 14, 2004. The species are considered to be patentably distinct as claimed. The requirement is still deemed proper and is therefore made FINAL.

Regarding claim 18, the elected species does not include "two auxiliary buffering units" but only one at 100.

2. Page 4, lines 17, 18, 23 "210" should be changed to "100" to be consistent with the elected species of Figs. 1A, 1B.

3. Claim 1, lines 1-2 "the" before "electronic device" should be changed to --an--.

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the feature of the "driving module" being "assembled in the auxiliary buffering unit" of claim 1, the last three lines must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet,

Art Unit: 3683

and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Akimaru et al (US 2003/0035362 A1), of record.

Fig. 14-15 of Akimaru et al disclose a dynamic vibration reduction system applicable in an electronic product with main buffering unit 7 and auxiliary buffering unit 53, 10 which is movable as broadly recited and includes driving module 2.

7. Applicant's arguments filed Sept. 23, 2004 have been fully considered but they are not persuasive. The claims include few details of the invention.

Art Unit: 3683

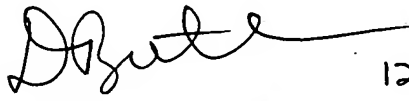

8. Claim 1, the last three lines includes an alternative expression that "the auxiliary buffering unit" is situated to "either" about the carrier or to be spaced from the carrier which is readable on Akimaru et al. Re the "driving module", where is the driving module in Figs. 1A, 1B?

8. Note attached Kao et al (6785217) with auxiliary buffering units 310 in Fig. 3.

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
